ELECTRIC MOTORS

About the motor

“SHARP” Electric Motors are energy efficient induction motors, built with robust construction, ideally suited to perform in any operating conditions. These are ideally suited for industrial, textile, machine tools, compressor, marine, material handling and agricultural applications

Salient Features

- High quality extruded aluminum body
- Double sealed precision ball bearings with life time lubrication
- Fitted with Thermal Overload Protector
- Stainless steel shaft
- Graded cast iron motor bearing housing
- TEFC capacitor start and run motor
- Single (or) Three phase options
- Light Weight

Electric Motor Specification

Power Range	0.18 Kw (0.25HP) to 22 kW (30HP)
Speed	500/750/1000/1500/3000 RPM
Frame	63 to 180L
Insulation Class	A/B/E/F
Supply	240 / 415 V
Enclosure	Totally enclosed fan cooled (TEFC)
Duty	Continuous (S1)
Protection	IP 44 / IP 55
