

HORIZONTAL MULTISTAGE PUMPS

The **Multistage Horizontal Centrifugal Pumps** represent the latest design in hydraulic technology. It generates a very good pressure and at the same time a high flow with low power consumption and with low noise. These are suitable for pressure boosting, irrigation purposes and for process water transfer and general industrial applications.

Salient Features

- Impellers and diffusers are made up of stainless steel
- Suction and Delivery Chamber available in stainless steel or cast iron
- High quality mechanical seal
- Maximum temperature = 70° C
- Low noise and most silent running
- High flow and low power consumption
- Optimum hydraulic characteristics
- High quality aluminum extruded body

Horizontal Multistage Pump Specification

S.No	Model		Power kW(HP)	Suction Lift m(ft)	Q Lpm M3/hr	40	60	80	100	120	Pipe size mm(inch)	
	1 Phase	3 Phase				2.4	3.6	4.8	6.0	7.2	Suction	Delivery
44	HM-75/3M	HM75/3T	0.55(0.75)	8(25)	Head in metre	23	20	17	14	7	25(1")	25(1")
45	HM-100/4M	HM100/4T	0.75(1.0)	8(25)		30	25	23	18	10	25(1")	25(1")
