

SELF PRIMING JET PUMPS

The **Self Priming Electro Jet Pumps** are basically centrifugal pumps but the advantage of being self priming. The **Venturi Tube System** provided guarantees optimum hydraulic yield and a high pressure making the jet pumps suitable for distributing water in domestic applications.

Salient Features

- **Venturi Nozzle System** on cast iron pump casing
- It can lift water from 9m depth and can operate even with air in the suction pipe
- High quality mechanical seal
- Stainless steel shaft
- High pressure capacity
- Maximum temperature = 50° C
- High quality aluminium extruded body

Self Priming Jet Pump Specification

S.N	Model		Power kW(HP)	Suction Lift m(ft)	Q	lpm	0	5	20	30	40	50	Pipe Size mm
	1 Phase	3 Phase					0	0.3	1.2	1.	2.	3.	
37	JET 05M	JET 05T	0.37 (0.50)	9 (28)	HEAD IN METRE	m ³ / hr	34	31	21	16	10	-	25 x 25
38	JET 07M	JET 07T	0.55 (0.75)	9 (28)			40	37	27	21	14	-	25 x 25
39	JET 10M	JET 10T	0.75 (1.0)	9 (28)			47	45	38	38	26	7	25 x 25
